

Executive Biography

Michael Hornby, Founder and CEO of Techmentum, is a technology leader with more than 20 years of experience helping businesses manage IT, cybersecurity, cloud adoption, and digital transformation. His expertise includes AI in the workplace, managed IT, professional IT services, application integration, and long-term technology strategy, with a focus on making technology practical, secure, and aligned with business goals. Throughout his career, he has worked in software development, IT support, infrastructure, and strategic advisory roles, giving him a strong understanding of how technology affects operations, risk, and growth. That experience has made him a trusted resource for organizations looking to modernize, strengthen security, and adopt new tools without losing sight of everyday business needs.

At Techmentum, Michael has used that experience to build a company focused on strategic guidance, responsive support, and real business value for small and mid-sized organizations. Under his leadership, the firm helps clients improve performance, reduce risk, and make technology decisions with greater clarity and confidence.

Short Biography
